# United Arab Emirates

Monetary, Banking & Financial Markets Developments

2021 – 2<sup>nd</sup> Quarter Report August 2021

# **Introduction**

As part of its commitment to promote economic and financial stability and growth in the UAE, the Central Bank of the UAE actively fosters a stable and efficient financial system by providing effective central banking services. The *United Arab Emirates Monetary, Banking and Financial Markets Developments Report* is one of the many avenues through which the Central Bank seeks to keep its stakeholders informed.

This report discusses the monetary and banking activities as well as developments in the UAE financial markets during the second quarter of 2021. The report also reviews ratios of annual change over the period from June 2020 to June 2021.

## **Monetary Developments**

Money Supply M<sub>1</sub>, which comprises Currency in Circulation outside Banks (Currency Issued - Cash at banks) plus Monetary Deposits, increased by 2.7% (q-o-q) during the second quarter of 2021.

On an annual basis, there was a 18.3% (y-o-y) climb in the monetary aggregate M<sub>1</sub>, reaching AED 659.5 billion at the end of June 2021.

Money Supply M<sub>2</sub> (M<sub>1</sub> plus Quasi Monetary Deposits (Resident Time and Savings Deposits in Dirham, plus Resident Deposits in Foreign Currencies)), also increased by 0.1% (q-o-q) during the second quarter of 2021.

On an annual basis, there was a 2.1% (y-o-y) increase in Money Supply M<sub>2</sub>, reaching AED 1,488.5 billion at the end of the second quarter of 2021.

Money Supply M<sub>3</sub> (M<sub>2</sub> plus government deposits at banks and at the Central Bank) rose by 0.4% (q-o-q) during the second quarter of 2021.

On an annual basis, there was a 1.2% (y-o-y) growth in Money Supply M<sub>3</sub>, reaching AED 1,772.6 billion at the end of June 2021.

Typically, the money supply  $M_2$  is considered the best indicator for the availability of liquidity in the economy, as it comprises currency in circulation outside banks, in addition to various deposits of all the resident sectors in dirham denomination, except for the deposits of the government sector in the UAE. Statistical data show that at the end of the second quarter of 2021, there was a q-o-q increase in  $M_2$ . The rise in  $M_2$  during the second quarter of 2021 was mainly due to a 0.1% quarterly increase in the non-government resident deposits standing at AED 1,392.7 billion at the end of June 2021.

#### Source- Data received from banks operating in the UAE

 $M_1$  = Currency in Circulation Outside Banks (Currency Issued - Cash at banks) + Monetary Deposits

 $\mathbf{M}_2 = \mathbf{M}_1 + \text{Quasi-Monetary Deposits}$ 

 $M_3 = M_2 + Government Deposits$ 

<sup>\*</sup>Estimates, subject to revision

# **Banking Sector Development**

# **1- Banks Operating in the UAE**

The number of locally incorporated banks remained constant at 21 banks at the end of the second quarter of 2021. The branches of these locally incorporated banks decreased to 522 branches at the end of June 2021. The number of electronic banking service units of these banks increased to 40 units at the end of the second quarter of 2021. The number of Cash Offices remains constant at 22 Cash Offices at the end of June 2021.

The number of GCC banks continue to remain steady at the end of second quarter of 2021 at 6 banks. The branches of these banks increased to 6 branches at the end of June 2021. The number of other foreign banks also remains unchanged at 21 banks with 68 branches. The number of electronic banking service units of these banks fell to 22 units at the end of the second quarter of 2021. The number of cash offices remains consistent at one cash office during the second quarter of 2021.

The technological and structural advancements in the UAE financial sector has resulted in increased accessibility of mobile banking applications, online banking and ease in the use of automated teller machines (ATM) for the past several years. These improvements continue to pay off by enhancing smooth operations of the banking system.

At the end of the second quarter of 2021, the number of financial institutions licensed by the Central Bank, i.e., Wholesale Banks, Representative Offices, Finance Companies, Moneychangers and Offices for Intermediating in Currency Trading & Money Market Operations reached 10, 83, 21, 93 and 10, respectively.

The total number of ATM of banks operating in the UAE reached 4,311 by the end of June 2021.

<sup>\*</sup>Estimates, subject to revision

#### 2- Bank Assets and Loans

At the end of the second quarter of 2021 total assets of banks operating in the UAE increased by 1.0% (q-o-q), reaching AED 3,208.8 billion. During the period between June 2020 and June 2021, the total assets of banks operating in the UAE increased by 0.6% (y-o-y).

Gross credit increased by 0.9% (q-o-q), reaching 1,769.4 billion at the end of June 2021. On an annual basis, gross credit decreased by 1.2%.

#### **3- Customer Deposits**

At the end of the second quarter of 2021, total deposits of resident and non-resident customers with banks operating in the UAE rose by 1.5% (q-o-q), reaching AED 1,908.6 billion. Resident deposits increased by 0.3% (q-o-q), reaching AED 1,682.9 billion at the end of the second quarter of 2021. Non-resident deposits rose by 10.9% (q-o-q), reaching AED 225.7 billion by the end of June 2021.

On an annual basis, Resident deposits and Non-resident deposits increased by 1.0% and 12.6%, respectively.

# 4- Capital and Reserves

Aggregate Capital and Reserves of banks operating in the UAE increased by 1.7% (q-o-q), reaching AED 384.5 billion at the end of the second quarter of 2021. At the end of the second quarter of 2021, Total Capital Adequacy Ratio stood at 17.5%, remaining well above the 13.0% Capital Adequacy Ratio, including the 2.5% Capital Conservation Buffer requirement and the 8.5% Tier1 Ratio, prescribed by the Central Bank regulations in compliance with the Basel III guidelines.

Although the Capital Conservation Buffer remains at 2.5%, banks may tap into the capital conservation buffer up to a maximum of 60% without supervisory consequences, effective 15 March 2020. The Domestic Systemically Important Banks' (D-SIBs) buffer remains the same; however, they may use 100% of their D-SIB buffer without supervisory consequences, effective 15 March 2020.

Capital adequacy ratios measure the amount of a bank's capital expressed as a percentage of its risk weighted exposures. A high capital adequacy ratio provides protection to depositors and promotes the stability and efficiency of the financial system of an economy. Effective December 2017, banks in the UAE follow Basel III principles for calculating the Capital Adequacy Ratios in line with the Guidelines issued by the Central Bank.
